PROFESSIONAL SUMMARY

MSc Data Analytics student with practical experience in data analysis, machine learning, NLP, and deploying AI-based solutions. Proficient in Python, SQL, and modern analytics tools.

SKILLS

Programming: Python, SQL, R

Data Analytics: Data Cleaning, EDA, Statistical Analysis, Data Visualization

AI / Machine Learning: Deep Learning, NLP, Predictive Analytics

Tools & Frameworks: Scikit-learn, TensorFlow, Flask, FastAPI, Streamlit

Visualization: Power BI, Tableau, Matplotlib

Databases & Tools: MySQL, MongoDB, Git, GitHub

PROJECTS

1. Talent AI – Smart Resume Screening & Ranking System | NLP, BERT, Flask

Developed an AI-powered resume screening and ranking platform using NLP and BERT-based ranking techniques. Automated candidate profile extraction, scoring, and ranking to reduce manual hiring effort. Implemented intelligent resume analysis and recruiter-friendly evaluation workflows. Deployed interactive web application for real-time candidate assessment. Research paper based on this project submitted for publication (currently under review).

[GitHub Repo](#) | [Live Demo](#)

2. Pare AI Chatbot | Flask, Gemini API, Automation

Built AI-powered conversational assistant integrated with Google Gemini API. Implemented appointment booking, real-time validation, bilingual interaction, and usage monitoring. Designed automated workflows for booking management and customer interaction.

[GitHub Repo](#) | [Live Demo](#)

3. DeepClean | CNN Autoencoder for Image Denoising | TensorFlow, Flask, CNN, Docker

Built and deployed a deep learning image denoising system using Convolutional Autoencoders trained on MNIST. Designed encoder-decoder architecture for reconstructing clean images from noisy grayscale inputs. Achieved **87.56% test accuracy** with efficient inference performance. Containerized and deployed using Docker and Hugging Face Spaces.

[GitHub Repo](#) | [Live Demo](#)

4. Named Entity Recognition System | NLP, Flask, Flair, PyTorch

Developed a hybrid NER engine using Flair + Regex + 40,000+ Indian Names Database. Built REST API for real-time extraction of Person, Organization, Location, Date, Email, URL, and Financial entities. Achieved 96.4% entity detection accuracy with fast response time. Deployed production-ready application using Docker and Flask.

EDUCATION

Master of Science in Data Analytics (MSc - DA) | June 2024 – April 2026

Pillai College of Arts, Commerce & Science

Bachelor of Science in Information Technology (BSc-IT) | June 2021 – March 2024

Pillai College of Arts, Commerce & Science

CERTIFICATIONS

Cisco Network Academy (2024): Data Analytics Essentials.

Salesforce (2024): Certified AI Associate and AgentForce Specialist
