PROFESSIONAL SUMMARY

AI-focused developer with hands-on experience building Agentic AI, RAG, NLP, voice-based AI, and backend applications using Python. Experienced in developing LLM-powered workflows, integrating external APIs and databases, and converting real-world business requirements into practical AI solutions.

TECHNICAL SKILLS

Programming: Python, SQL, R

AI & Machine Learning: Machine Learning, Deep Learning, NLP, RAG, LLMs, Agentic AI, Prompt Engineering

Backend & APIs: FastAPI, Flask, REST APIs, OOP

Databases: MySQL, PostgreSQL, MongoDB

Data & Visualization: Pandas, NumPy, Matplotlib, Excel, Power BI (Basic)

Tools & Deployment: Git, GitHub, Docker, API Integration, JWT

PROFESSIONAL EXPERIENCE

WERQ Labs Pvt. Ltd., Sanpada, Navi Mumbai | **Python AI Intern** | On-Site | **June 16, 2026 – September 16, 2026**

- Developed Python-based AI applications by translating real-world requirements into functional prototypes and backend solutions using Python, OOP, NLP, Machine Learning, FastAPI, Flask, and REST APIs.
- Worked on RAG, LLM, prompt engineering, agent workflows, tool integration, response validation, and AI-driven application development across multiple internship projects.
- Developed and contributed to Agentic AI and voice-based applications, integrating AI workflows with databases, APIs, authentication, validation, and backend business logic.
- Collaborated with the AI team on voice/audio asset creation and AI workflow development for major project requirements, contributing to the integration of conversational and voice-based components.

PROJECTS

1. Agentic AI Travel Planner

• Developed an Agentic AI travel planning system using FastAPI and multi-agent orchestration to coordinate transport, hotels, activities, and weather, incorporating LLM-driven planning, API integrations, verification, constraint handling, itinerary optimization, caching, and observability for reliable end-to-end trip planning.

2. AI Voice Agent for Internet Service Provider

• Developed a voice-based AI customer support agent using FastAPI, LangGraph, Groq/Whisper, Kokoro TTS, and MongoDB to handle customer interactions, verify users, create and track support tickets, and provide ticket status updates through an automated conversational workflow.

3. RAG Tourism Chatbot – Kolhapur

• Built a domain-specific RAG chatbot for Kolhapur tourism using FastAPI, Sentence Transformers, FAISS, MongoDB, and Groq/Llama, processing tourism documents into a searchable knowledge base and generating context-grounded responses through semantic retrieval and LLM-based generation.

4. Talent AI – Smart Resume Screening & Ranking System | NLP, BERT, Flask

Developed an AI-powered resume screening and ranking platform using NLP and BERT-based ranking techniques
Automated candidate profile extraction, scoring, and ranking to reduce manual hiring effort.
Implemented intelligent resume analysis and recruiter-friendly evaluation workflows.
Deployed interactive web application for real-time candidate assessment.
Research paper based on this project submitted for publication (currently under review).

EDUCATION

Master of Science in Data Analytics (MSc - DA) | June 2024 – April 2026
Pillai College of Arts, Commerce & Science
Bachelor of Science in Information Technology (BSc-IT) | June 2021 – March 2024
Pillai College of Arts, Commerce & Science

CERTIFICATIONS

Cisco Network Academy (2024): Data Analytics Essentials.
Salesforce (2024): Certified AI Associate and Agentforce Specialist
